

## InstantScan

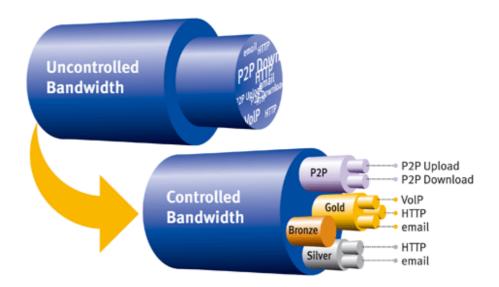

#### Highlight

- Plug and play without reconfiguring any current network settings.
- Deep inspection on P2P / VoIP / MSN / ... over HTTP
- Import from Windows AD and manage by account / group
- Manage IM behaviors such as login / chat / file-transfer / filesharing / video / voice / remote access / photo-sharing / ...
- Manage IM contents by chat keyword filtering, filename keyword filtering, URL keyword filtering
- Manage web behaviors by URL database with instant warning of reasons
- Offer built-in service update on protocol recognization patterns, URL database
- Support IM/ Web / WebMail / SMTP / POP3 / FTP / Telnet content filtering / recording
- Support dynamic bandwidth borrowing and renting with priority, stochastic fair queuing, bandwidth pipes.
- Support web-login to grant users by authentication with external POP3 / IMAP / Radius / LDAP servers
- Support accurate policy on time control to have different rules at different shedules
- Offer many reporting/monitoring tools to analyze behaviors.
- Support hardware bypass to have

## L7 Bandwidth Management/Recorder

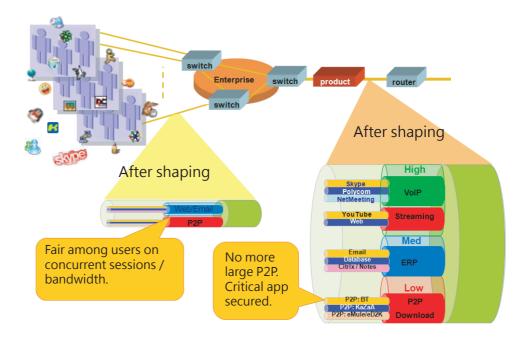

#### ■ What are employees doing at work?

Employees should focusing on office-related things instead of just chatting with friends by MSN / Yahoo / ICQ/ AOL / Skype, or browsing websites such as facebook or games. Sometimes they even download illegal movies by P2P applications such as eDonkey/Xunlei. These behaviors kill your productivity and squeeze your bandwidth.

#### ■ Solutions: L7 InstantScan

With layer-7 protocol recognization in the first stage, traffic is analyzed and normalized into their true behavior; After deep inspection into the contents, traffic is filtered and recorded into the databases; Our InstantScan / InstantQoS offers enterprise-level solutions while InstantCare offers SMB / SOHO / Home solutions

## Networks Secure Networks at Layer-7

### L7 Bandwidth Management/Recorder

# InstantScan

About L7 Networks Inc. Founded in 2002, members from senior R&D teams, joint ventured with D-Link, ZyXEL, Advantech, L7 has OEM its UTM products to many major networking companies.

Since 2005, L7 focused on L7 / L8 / L9 / L10 technologies to control applications and their detailed behaviors / contents, even within SSL tunnels.
